EB Series Stands

This latest design improves on our popular UPD cart, which has been the gold standard for years. Available as either a static stand or mobile display cart, the EB Series gives you the best of both worlds. This stand features an elegant, dark gray base with elliptical curves and polished chrome poles. Route cables inside the poles. Or add our optional cover packs (CPA), and run cables down the center. Select the standard model, and receive an attractive stand with adjustable feet for easy leveling. Select the "C" model, and receive the best mobile stand on the market with smooth rolling casters for excellent maneuverability.

CARTS The industry standard

Add optional shelves (PSD-SHA) to hold your laptop, DVD player or more. The EB Series mates with all PSM and CTM series plasma mounts, which must be added to complete the system. See pages 34-35 for adapters and accessories.

PSD-EB72 shown with optional shelf and cover pack
